ECONOMICS

GENERAL OBJECTIVES

The aim of the Unified Tertiary Matriculation Examination (UTME) syllabus in Economics is to prepare the candidates for the Board's examination. It is designed to test their achievement of the course objectives, which are to:

- 1. demonstrate sufficient knowledge and understanding of the basic concepts, tools and their general applications to economic analysis;
- 2. identify and explain the basic structures, operations and roles of the various economic units and institutions (national and international);
- 3. describe major economic activities production, distribution and consumption;
- 4. identify and appraise the basic and current economic problems of society;
- 5. develop the competence to proffer solutions to economic problems identified.

DETAILED SYLLABUS

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Economics as a science a. Basic Concepts: Wants, Scarcity, choice, scale of preference, opportunity cost, Rationality, production, distribution, consumption. bi. Economic problems of: What, how and for whom to produce and efficiency of resource use. bii. Application of PPF to solution of economic problems.	Candidates should be able to: (i) compare various concepts in economics and their applications; (ii) interpret graphs/schedules in relation to the concepts; (iii) identify economic problems; (iv) proffer solutions to economic problems
2. Economic Systems a. Types and characteristics of free enterprise, centrally planned and mixed economies b. Solutions to economic problems under different systems c. Contemporary issues in economic systems	Candidates should be able to: (i) compare the various economic systems; (ii) apply the knowledge of economic systems to contemporary issues in Nigeria (iii) proffer solutions to economic problems in different economic systems.

TOPICS/CONTENTS/NOTES	OBJECTIVES
(economic reforms e.g deregulation,	
banking sector consolidation, cash policy	
reform).	
3. Methods and Tools of Economic Analysis	Candidates should be able to:
a. Scientific Approach:	(i) distinguish between the various forms of
i. inductive and deductive methods	reasoning;
ii. positive and normative reasoning	(ii) apply these forms of reasoning to real life
	situations;
b. Basic Tools	
i. tables, charts and graphs	(iii) use the tools to interpret economic data;
ii. measures of central tendency: mean,	(iv) analyse economic data using the tools;
median and mode, and their	(v) assess the merits and demerits of the tools.
applications.	
iii. measures of dispersion; variance,	
standard deviation, range and their	
applications; iv. merits and demerits of the tools.	
iv. merits and demerits of the tools.	
4. The Theory of Demand	Candidates should be able to:
a. i. meaning and determinants of demand	(i) identify the factors determining demand;
ii. demand schedules and curves	(ii) interpret demand curves from demand
iii. the distinction between change in	schedules;
quantity demanded and change in	(iii) differentiate between change in quantity
demand.	demanded and change in demand;
b. Types of demand:	(iv) compare the various types of demand and
Composite, derived, competitive and	their interrelationships;
joint demand:	(v) relate the determinants to the nature of
c. Types, nature and determinants of elasticity and their measurement -	elasticity; (vi) compute elasticities;
price, income and cross elasticity of	(vii) interpret elasticity coefficients in relation
demand:	to real life situations.
d. Importance of elasticity of demand to	to roa me ordanions.
consumers, producers and government.	
, r	

	TOPICS/CONTENTS/NOTES	OBJECTIVES
5.	The Theory of Consumer Behaviour	Candidates should be able to:
	a. Basic Concepts:	(i) explain the various utility concepts;
	i. utility (cardinal, ordinal, total	(ii) apply the law of demand using the
	average and marginal utilities)	marginal utility analysis;
	ii. indifference curve and budget	(iii) use indifference curve and marginal
	line.	analyses to determine consumer
		equilibrium;
	b. Diminishing marginal utility and the law	(iv) relate the income and substitution effects;
	of demand.	(v) apply consumer surplus to real life
	c. Consumer equilibrium using the	situations.
	indifference curve and marginal	
	analyses.	
	d. Effects of shift in the budget line and the	
	indifference curve.	
	e. Consumer surplus and its applications.	
		Candidates should be able to:
6.	The Theory of Supply	(i) identify the factors determining
	a. i. Meaning and determinants of	supply;
	supply	(ii) interpret supply curves from supply
	ii. Supply schedules and supply curves	schedules;
	iii. the distinction between change in	(iii) differentiate between change in quantity
	quantity supplied and change in	supplied and change in supply;
	supply b. Types of Supply:	(iv) compare the various types of supply and their interrelationships;
	Joint/complementary, competitive and	(v) relate the determinants to the nature of
	composite	elasticity;
	c. Elasticity of Supply:	(vi) compute elasticity coefficients;
	determinants, measurements, nature and	(vii) interpret the coefficients in relation to real
	applications	live situations.
7.	The Theory of Price Determination	Candidates should be able to:
	a. The concepts of market and price	(i) explain the concepts of market and price;
	b. Functions of the price system	(ii) examine the functions of the price system;
	c. i. Equilibrium price and quantity in	(iii) evaluate the effects of government
	product and factor markets	interference with the price system;
	ii. Price legislation and its effects	(iv) differentiate between minimum and

		TOPICS/CONTENTS/NOTES		OBJECTIVES
	d.	The effects of changes in supply and		maximum price legislation;
		demand on equilibrium price and	(v)	interpret the effects of changes in supply
		quantity.		and demand on equilibrium price and
				quantity.
8.	Th	ne Theory of Production	Candio	dates should be able to:
	a.	Meaning and types of production	(i)	relate TP, AP and MP with the law of
	b.	Concepts of production and their		variable proportion;
		interrelationships (TP, AP, MP and the	(ii)	compare internal and external economies
		law of variable proportion).		of scale in production and their effects;
	c.	Division of labour and specialization	(iii)	identify the types of production functions
	d.	Scale of Production:	(iv)	compare the different types of returns to
		Internal and external economies of scale		the scale and their implications;
		and their implications.	(v)	determine the firm's equilibrium position
	e.	Production functions and returns to		using the isoquant-isocost and marginal
		scale		analyses.
	f.	Producers' equilibrium isoquant-isocost	(vi)	identify the factors affecting productivity.
		and marginal analyses.		
	g.	Factors affecting productivity.		
9.	Theo	ory of Costs and Revenue	Candida	ates should be able to:
	a.	The concepts of cost:	(i)	explain the various cost concepts
		Fixed, Variable, Total Average and	(ii)	differentiate between accountants' and
		Marginal		economists' notions of costs
	b.	The concepts of revenue: Total, average	(iii)	interpret the short-run and long-run costs
		and marginal revenue;		curves
	c.	Accountants' and Economists' notions	(iv)	establish the relationship between marginal
		of cost		cost and supply curve.
	d.	Short-run and long-run costs	(v)	explain the various revenue concepts.
	e.	The marginal cost and the supply curve		
		of firm.		
10.	Mar	ket Structures	Candida	ates should be able to:
	a.	Perfectly competitive market: i. Assumptions and characteristics;	(i)	analyse the assumptions and characteristics of a perfectly competitive market;

TOPICS/CONTENTS/NOTES	OBJECTIVES
·	
ii. Short-run and long-run equilibrium of a perfect competitor;	(ii) differentiate between short-run and long- run equilibrium of a perfectly competitive firm;
b. Imperfect Market:	(iii) analyse the assumptions and
i. Pure monopoly, discriminatory monopoly and monopolistic	characteristics of imperfect markets; (iv) differentiate between the short-run and
competition.	long-run equilibria of imperfectly
ii. Short-run and long-run equilibrium positions.	competitive firms; (v) establish the conditions for the break-even/shut down of firms.
c. Break-even/shut-down analysis in the various markets.	
11. National Income	Candidates should be able to:
a. The Concepts of GNP, GDP, NI, NNPb. National Income measurements and	(i) identify the major concepts in national income;
their problems c. Uses and limitations of national income	(ii) compare the different ways of measuring national income;
estimates	(iii) examine their problems; (iv) assess the uses and limitations of
d. The circular flow of income (two and three-sector models)	(iv) assess the uses and limitations of national income estimates;
e. The concepts of consumption,	(v) interpret the circular flow of income
investment and savings	using the two and three-sector models;
f. The multiplier and it effects g. Elementary theory of income	(vi) calculate the various multipliers; (vii) evaluate their effects on equilibrium
determination and equilibrium national	national income;
income.	(viii) explain the concepts of consumption, investment and savings.
12. Money and Inflation	Candidates should be able to:
a. Types, characteristics and functions of money	(i) explain between the types, characteristics and functions of money;
b. Demand for money and the supply of	(ii) identify the factors affecting the
c. Quantity Theory of money (Fisher equation)	demand for and the supply of money; (iii) examine the relationship between the value of money and the price level;
d. The value of money and the price level	(iv) identify the components in the quantity
e. Inflation: Types, measurements, effects and control	theory of money; (v) examine the causes and effects of
f. Deflation: Measurements, effects and	inflation;
control.	(vi) calculate the consumer price index; (vii) interpret the consumer price index;
	(viii) examine ways of controlling inflation.
	(ix) Examine the causes, measurement, effects and control of deflation.
13. Financial Institutions	Candidates should be able to:
a. Types and functions of financial	(i) Identify the types and functions of
institutions (traditional, central bank, mortgage banks, merchant banks,	financial institutions; (ii) Explain the roles of financial

TOPICS/CONTENTS/NOTES	OBJECTIVES
insurance companies, building societies); b. The role of financial institutions in economic development; c. Money and capital markets d. Financial sector regulations e. Deposit money banks and the creation of money f. Monetary policy and its instruments g. Challenges facing financial institutions in Nigeria.	institutions in economic development; (iii) Distinguish between the money and capital markets; (iv) Identify the various financial sector regulators and their functions; (v) Explain the money creation process and its challenges; (vi) Examine the various monetary policy instruments and their effects; (vii) Appraise the challenges facing the financial institutions in Nigeria.
 a. Meaning and objectives b. Fiscal policy and its instruments c. Sources of government revenue (taxes royalties, rents, grants and aids) d. Principles of taxation e. Tax incidence and its effects f. The effects of public expenditure g. Government budget and public debts h. Revenue allocation and resource control in Nigeria. 	Candidates should be able to: (i) identify the objectives of public finance; (ii) explain fiscal policy and its instruments; (iii) compare the various sources of government revenue (iv) analyse the principles of taxation; (v) analyse the incidence of taxation and its effects; (vi) examine the effects of public expenditure on the economy; (vii) examine the types and effects of budgets; (viii) highlight the criteria for revenue allocation in Nigeria and their impact.
15. Economic Growth and Development	Candidates should be able to:
 a. Meaning and scope b. Indicators of growth and development c. Factors affecting growth and development d. Problems of development in Nigeria e. Development planning in Nigeria. 	 (i) distinguish between economic growth and development; (ii) highlight the indicators of growth and development; (iii) identify the factors affecting growth and development; (iv) examine the problems of development in Nigeria; (v) examine the role of planning in development;
16. Agriculture in Nigeria	Candidates should be able to:
 a. Types and features; b. The role of agriculture in economic development; c. Problems of agriculture; d. Effects of agricultural policies and their effects; e. Instability in agricultural incomes (causes, effects and solutions). 	 (i) identify the types and features of agriculture; (ii) examine the characteristics and problems of agriculture; (iii) assess the role of agriculture in economic development; (iv) appraise agricultural policies in Nigeria; (v) evaluate the causes and effects of instability in agricultural incomes.

TOPICS/CONTENTS/NOTES	OBJECTIVES
17. Industry and Industrialization	Candidates should be able to:
a. Concepts and effects of location and localization of industry in Nigeria; b. Strategies and Industrialization in Nigeria; c. Industrialization and economic development in Nigeria; d. Funding and management of business organization; e. Factors determining the size of firms. 18. Natural Resources and the Nigerian Economy a. Development of major natural resources (petroleum, gold, diamond, timber etc); b. Contributions of the oil and the non-oil sectors to the Nigerian economy; c. Linkage effects;	(i) differentiate between location and localization of industry; (ii) identify the factors influencing the location and localization of industry; (iii) examine the problems of industrialization; (iv) appraise some industrialization strategies; (v) examine the role of industry in economic development. Candidates should be able to: (i) trace the development of the major natural resources in Nigeria; (ii) assess the contribution of the oil and the non-oil sectors to the Nigerian economy; (iii) establish the linkages between the natural resources and other sectors;
 d. Upstream/downstream of the oil sector; e. The role of NNPC and OPEC in the oil sector; f. Challenges facing natural resources exploitation. 	 (iv) analyse the environmental effects of exploitation activities in Nigeria; (v) distinguish between the upstream and downstream activities in the oil sector; (vi) examine the roles of NNPC and OPEC in the oil sector; (vii) suggest ways of controlling the effects of natural resources exploitation.
19. Business Organizations	Candidates should be able to:
 a. Private enterprises (e.g. sole-proprietorship, partnership, limited liability companies and cooperative societies) b. Problems of private enterprises; c. Public enterprises and their problems; d. Funding and management of business organizations; e. Factors determining the size of firms; f. Privatization and Commercialization as solutions to the problems of public enterprises. 	 (i) compare the types and basic features of private business organization; (ii) assess the financing and management problems of business organizations; (iii) identify the features of public enterprises; (iv) identify the factors determining the size of firms; (v) differentiate between privatization and commercialization; (vi) compare the advantages and disadvantages of privatization and commercialization;
20. Population	Candidates should be able to:
a. Meaning and theories;b. Census: importance and problems.	(i) analyse some population theories: (ii) examine the relevance of the theories to Nigeria;

TOPICS/CONTENTS/NOTES	OBJECTIVES
c. Size and growth: over-population, under-population and optimum population. d. Structure and distribution; e. Population policy and economic development.	 (iii) examine the uses and limitations of census data; (iv) identify determinants of the size, composition and growth of population; (v) analyse the structure and distribution of population; (vi) appraise government population policy in Nigeria.
 21. International Trade a. Meaning and basis for international trade (absolute and comparative costs etc) b. Balance of trade and balance of payments: problems and corrective measures; c. Composition and direction of Nigeria's foreign trade; d. Exchange rate: meaning, types and determination. 	Candidates should be able to: (i) examine the basis for international trade. (ii) differentiate between absolute and comparative advantages; (iii) distinguish between balance of trade and balance of payments and their corrective measures; (iv) highlight the problems of balance of payments and their corrective measures; (v) examine the composition and direction of Nigeria's foreign trade; (vi) identify the types of exchange rates; (vii) examine how exchange rates are determined.
22. International Economic Organizations Roles and relevance of international organization e.g. ECOWAS, AU, EU, ECA, IMF, EEC, OECD, World Bank, IBRD,	Candidates should be able to: (i) identify the various economic organizations and their functions; (vii) evaluate their relevance to the Nigerian economy
WTO, ADB and UNCTAD etc to Nigeria. 23. Factors of Production and their Theories a. Types, features and rewards; b. Determination of wages, interest and profits; c. Theories: marginal productivity theory of wages and liquidity preference theory; d. Factor mobility and efficiency; e. Unemployment and its solutions	Candidates should be able to: (i) identify the types; features and rewards of factors; (ii) analyse the determination of wages, interest and profits; (iii) interpret the marginal productivity of liquidity preference theories (iv) examine factors mobility and efficiency; (v) examine the types and causes of unemployment in Nigeria; (vi) suggest solutions to unemployment in Nigeria.
