NATIONAL TECHNICAL CERTIFICATE EXAMINATION

FURNITURE MAKING (FURNITURE DESIGN AND CONSTRUCTION)

PAPER CODE 231 – 1

1a. A rectangular occasional table is to be made for the office of a principal. The table is to be made from 22mm thick wood, the length is 920mm, width is 400m and height is 400mm. Use your discretion in determining the width of the legs, rails and draw to a scale 1:5?

Answer:

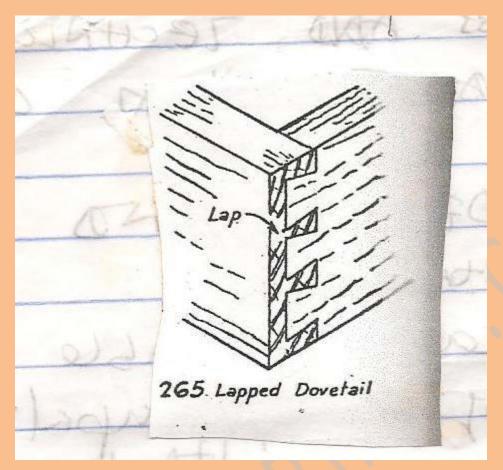

- (a) Front elevation
- (b) Sectional end view
- (c) Plan

Answer	Front elev	endjormini	20
6	sectional	end vient	\$- 100mm; 7
C	plan, p		AL I IVA

- 2. Make real sketches of the following jointly.
- (i) Hand made through dovetail

		-		
	Half Pin	R- Sa		toop -
	Full Pin		Dovetail.	
			Pin Socket	
- ANA	Dovetail	6h		

2b. Machine made Lapped Dovetail.

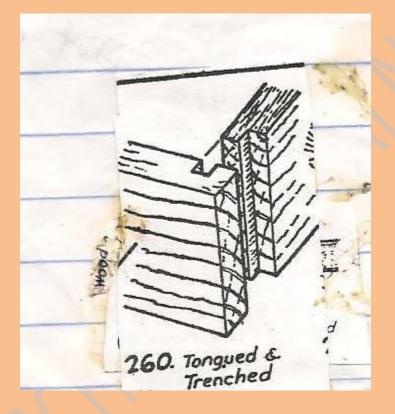

2c. Dovetailed housing.

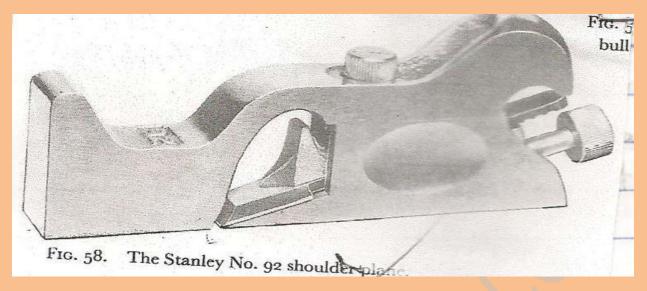

2d. Trenches.

Stopped Throug 245. TRENCHES

2e. Tongued and trenched.

Uses: - A metal rebate plane intended for use on work demanding a high finish. It is used in trimming the shoulders of hardwood terons which are required to fit very accurately.

3b. BLOCK PLANE

(Metal)	Cutting Iron
	Bevel up
160 - 170 -	Pitch
Fig. 26 BLOCK Single h	PLANE
Single h	ron 35-41mm wide

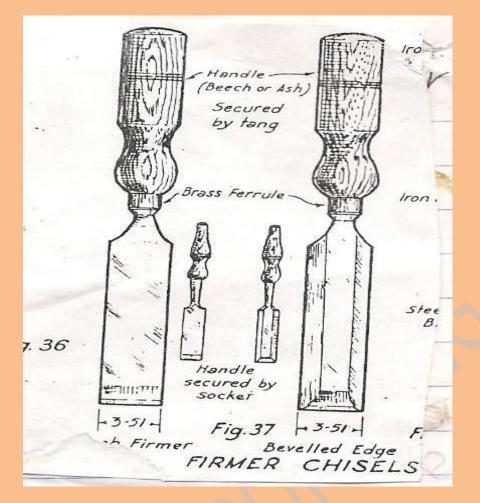

Uses:- for plain end grains e.g. finishing small mitres and for plaining small chainfers, especially across the grain.

3c. GRINDING SCRIBING GOUGE

(c) stropping iaped Vheel Cone Wheel Fig. 15. GRINDING SCRIBING GOUGE Ð (b) Removing burr rel · HONING SCRIBING GOUGE Fig. 16 Fig. 17

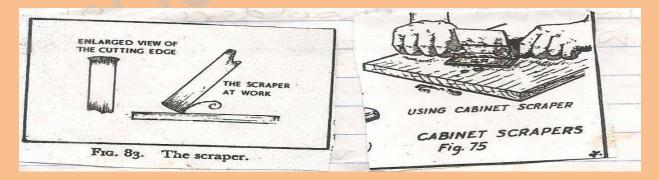

Uses: - It is used for contour work where hollow or concave curves are required.

3d. flimer chisel:-

Uses: For general chiseling purposes. Being fairly strongly made it can be used for light chiseling with a mallet.

3e. Cabinet scraper.

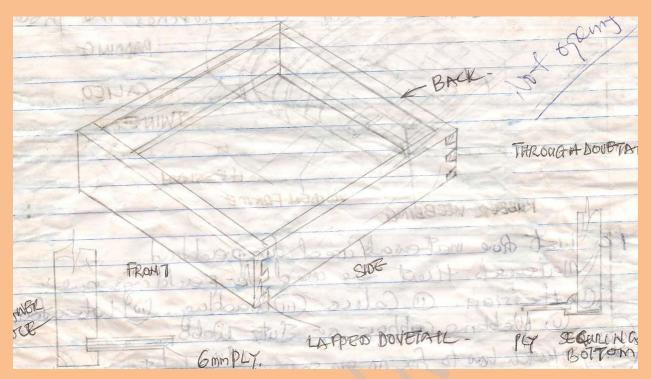

Uses: - it is used in the finishing of hardwood, being particularly useful on short grain where there is danger of tearing the surface with even a very finely adjusted smoothing plane.

- 4. Explain the following properties of timber?
- 4a. Elasticity: The property which enables the wood to return to shape after bending.
- b. Hardness or Strongness :- The ability to resist indentation, bruising and abrasion.
- c. Durability: Ability of wood to resist decay, bores, termites and weathering.
- d. Toughness; The ability of wood to resist shocks without breaking e.g tool handles.

Stiffers' strength:- Ability of timber to resist bending when loads applied.

5a. Explain with the aid of sketches the process of constructing a drawer with lap and through dovetail joints.

GROOVE IN DRAWBR SIDB

5b. The process of constructing a drawer with lap and through dovetail joint.

The processes of drawer construction have four steps which are:

- (a) Preparation of the member parts
- (b) Setting out of parts
- (c) Cutting at the joints
- (d) Fixed assembling.
